Comments: Please DO NOT let oil & gas exploration happen in the Ruby Mountains of Nevada!! Right now the U.S. has thousands of capped oil & gas wells already drilled and ready to go , but demand is ZERO. Since we don't need any more gas & oil wells because demand is slowly, but surely slowing down because of the turn towards green technology. The gas & oil industry is seeing their future slowly dim and they are not willing to let it go. We just don't need any more wells. These mountains are pristine & untouched. Thousands of animals live here and thrive because of no human contact. We MUST keep land like this forever and not bow to interests are only for the greed of money. Our children and their children's children need to have untouched America to see and explore without machines.
