Comments: Don't Allow Fracking in the Ruby Mountains

Dear Ms. Elliott,

Frankly, I cant quite comprehend the fact that our government has no other financial opportunity except for mining & drilling & fracking! Its pas time for the USFS to remove their heads from wherever they have them and find an alternative to destroying our natural resources. Our wildlife & its habitat are far more important than the fossil fuel industry's bottom line. NO MORE FOSSIL FUEL EXTRACTION! In other areas of the US, solar and wind energies are becoming more common. That's where forward-thinking humans are looking. Time for a change.

Maggie Frazier
