Comments: Don't Allow Fracking in the Ruby Mountains

Dear Ms. Elliott,

It is totally unacceptable, inexcusable and unforgivable that our wonderful environment and wildlife are being destroyed for fracking and drilling for oil and gas through greed and indifference.

The Ruby Mountains are one of the most spectacular landscapes in Nevada. With abundant big game, robust trout fisheries and dense sage grouse habitat, the Rubies are a critical resource for wildlife.

Fracking and drilling for oil and gas would irreparably harm this undisturbed area. The waters that our trout rely on could be poisoned in spills or well failures after fracking. Mule deer habitat would be fragmented, and the deers' ability to safely overwinter would be compromised. Vulnerable sage grouse, known to be negatively affected by oil and gas development, will inch steadily closer to extinction.

I urge you not to permit any leasing for oil and gas in the Ruby Mountains. Non-surface occupancy stipulations do nothing to protect our precious aquatic resources from the harms of fracking. The only way to protect the fragile resources of the Rubies is to forbid leasing on all of these parcels.

Wind and sun is surely the energy of the future...without a need to destroy!!!

Sincerely

Angela Brooke-Ward
