Comments: DON'T ALLOW FRACKING IN THE RUBY MOUNTAINS

Dear Ms. Elliott,

The Ruby Mountains are one of the most spectacular landscapes in Nevada. With abundant big game, robust trout fisheries and dense sage grouse habitat, the Rubies are a critical resource for wildlife.

Fracking and drilling for oil and gas would irreparably harm this undisturbed area. The waters that our trout rely on could be poisoned in spills or well failures after fracking. Mule deer habitat would be fragmented, and the deers' ability to safely overwinter would be compromised. Vulnerable sage grouse, known to be negatively affected by oil and gas development, will inch steadily closer to extinction.

STOP DOING WHAT THE GREEDY OIL & GAS CORPORATIONS TELL YOU WHAT TO DO WITH THEIR HIGH PRESSURE INFLUENCE & \$\$\$.

I STRONGLY DEMAND YOU NOT TO PERMIT ANY LEASING FOR OIL & GAS IN THE RUBY MOUNTAINS. ON-SURFACE OCCUPANCY STIPULATIONS DO NOTHING TO PROTECT OUR PRECIOUS AQUATIC RESOURCES FROM THE HARM OF FRACKING. THE ONLY WAY TO PROTECT THE FRAGILE RESOURCES OF THE RUBIES IS TO FORBID LEASING ON THESE PARCELS.

Thank you,

Mark Feldman
