Comments: Don't Allow Fracking in the Ruby Mountains

Dear Ms. Elliott,

As an American Citizen and taxpayer I am writing to share my opposition to tracking in the Ruby Mountains of Nevada. With abundant big game, robust trout fisheries and dense sage grouse habitat, the Rubies are a critical resource for wildlife and fracking and drilling for oil and gas would irreparably harm this undisturbed area.

There is no reason to do this, other than to spite the Obama administration's excellent record on the environment and to line the pockets of the gas industry in return for their campaign contributions.

Therefore I urge you not to permit any leasing for oil and gas in the Ruby Mountains.

Thank you,

Gina Megay
