Comments: Nothing good ever came from oil projects I'm not sure why this plan could be taken in consideration it's crazy if you ask me. I know a lot of people who still have land in Ruby valley especially ranchers or have family members buried in that area , I can guarantee you that none of them are gonna settle upon this plan! Just think about this how much land in the United States still has its natural beauty?.. I can say not very many places still does it's been stripped away overtime from projects like this ... it won't bring anything good from it , all it will do is disrupt the wild life , pollute the air , damage the landscape, possibly contaminate the water too . Please don't go through with this plan it will destroy what natural beauty we have left in this area .
