Comments: While the fracking corporate giants will say that there is no proven contamination of groundwater systems because the injection is too deep, and/or the casing is sealed, etc, they are full of it. They cannot account for human error and surface leaks and undetected cracks in well-casing. No amount of tax dollars is worth it; no amount of corporate profit is worth it; no backroom glad handing for political favors is worth it; no corporatists 3rd home is worth it. We don't need more fossil fuel energy. DO NOT contaminate our Nevada waters. DO NOT sell your soul to the devil.
