Comments: Greetings!

To whom it may concern, as a concerned citizen-tax payer, I truly believe this is a bad idea. We should be thinking about the long term consequences of short-term profiteering. What are we leaving for our children and future generations? Must we carve up and plunder this whole earth?

We have better alternatives that should be used and expanded like wind, solar, geothermal, etc. These companies should be focused on options other than more climate changing fossil fuels. We should all be, including the US Forest Service. The future is here and we can do so much better than this. I trust and hope the decision makers will make the right choice and do the right thing. God Bless America!

Sincerely,

James P. Stevenson
