Comments: The Rubies are one of Nevada's gems for backcountry fishing and hunting. I urge you to not lease out land in the Rubies for oil and natural gas. We are so lucky to live in a state with so many beautiful places to recreate, I would hope you could find a more desolate area that wouldn't be as affected by fracking as this area would be since it's habitat for a large herd of mule deer and critical habitat for Lahontan Cutthroat Trout.
