Comments: I can not believe that the Forest Service and/or BLM would consider ruining the Ruby Mountain areas as outlined in the map for oil and gas leasing. This area is a scenic bypass and enjoyed by all residents and many tourists. This area is used for hiking and also for hunting and fishing. We have seen what gas and oil leases can do to an area. They show no regard to the residents and ruin the area for those of us living there. Access to this area will be restricted and suddenly the Forest Service and/or BLM will think they own the area that belongs to the people. Our water will be polluted and the landscape disfigured. We strongly oppose any consideration to allowing oil and gas leasing in the Ruby Mountains.
