First name: Philip

Last name: Meyer

Organization:

Title:

Comments: I oppose any (i) "removing overstory trees to create ½ acre up to one acre openings", (ii) use of herbicides other than on invasive species, (iii) closing of Mill Creek or Cohutta overlooks/observation decks, or (iv) in general, any use of chainsaws other than for road maintenance. In general, we should be letting our forests heal themselves....which they can certainly do without our help/interference....read The Hidden Life of Trees by forester Peter Wohlleben....forests were fine for eons before humans arrived to disrupt and damage them.

I support the proposed Next Steps for Holly Creek Day Use, Conasauga Ranger District.
