Title:

Comments: Dear Forest Service,

I live in Lamoille, Nevada on 1152 Sustacha Drive. I live within a half mile of the entrance of Lamoille Canyon. There is an active fault within a quarter mile of my home and several neighbors who are much closer to it. I have had many small earth quakes over the years so I decided to get earthquake insurance. I am an artist so I have enjoyed painting the beauty of the canyon. The canyon is highly popular to artists, hikers, Hela-skiers, hunters, equestrians, snow mobilers, and people who enjoy the fragil beauty of the area. Harrison pass is part of one hiking trail that either begins or end in Lamoille Canyon. I am in objection of the leasing of these Lamoille Lands for oil and gas by the Bureau of Land Mangement. Reasons for the objection:

- 1 - This leasing will affect a huge number of people in a negative manner.
- 2 - It has a definite possibility of increasing the earth quakes that already occur in the canyon.
- 3 - It may have a negative impact on the various businesses involved with the land area.
- 4 - It will have a negative effect on one of the most precious and beautiful parts of this State of Nevada.

Sincerely,

Lynne Kistler
