Comments: Ruby Oil and Gas

Susan,

As an outdoorsmen who hunts, fishes, and photographs in this area of Spring Creek and the Ruby Mountains I am opposed to any such leasing of this land or area for exploration. The land here is priceless. You will not find a more beautiful area in Nevada. To open this pristine area up to exploration and drilling would have a negative impact on natural resources like water, wilderness, and wildlife. It would also have an impact on the infrastructure of Elko County. Our roads in this area are already crammed with traffic and the addition of drilling equipment and more vehicles would not be advantageous to anyone except the drilling companies themselves. Thank you for your time and I hope that others will express their cot this project also. Land and resources of this nature are irreplaceable. To scar this beauty with drill rigs or fracking operations would be a disservice to all. Our future generations would be robbed of this natural wonderland.
