Comments: Ruby Oil and Gas

Hello,

I am a Spring Creek, NV resident and an active outdoor enthusiast who values the Ruby Mountains untouched of oil and gas development. The impacts of this development to recreation would be incredibly detrimental to those who value these mountains like I do and all future generations to come. Additionally I am a wildlife biologist and would like to reiterate the comments submitted by NDOW concerning the impacts this would have on wildlife populations and their habitat. Mule Deer and grouse use most, if not all, of the proposed areas. Along with many other species. With this being said I strongly oppose this proposal. These are our public lands and should not be used for private gain in this manner. Please protect our public lands.
