Comments: Proposal for gas/oil drilling

It is with great urgency we are writing to put an end to any thought of gas and oil drilling in the Lamoille Canyon, Harrison Pass, Ruby Mountain area as currently is being proposed.

Geologically I understand from those in the know, this type of rock formations found there are generally not conducive to finding that resource.

Aesthetically, scarring the land of one of the most treasured areas in all of Nevada would be an abomination

Biologically, this is prime habitat for mule deer, sage grouse, and other species of wildlife in that ecosystem.

We implore you to pass on our grave concerns

Thank you MS Elliot for passing on our thoughts,

Karen and Michael Green
