Comments: Ruby Oil and Gas

Dear Ms. Elliott,

I'm writing as a concerned citizen of the Lamoille area and ask that you please do NOT lease some of the most beautiful country in the world for oil and gas entry. The potential hazards to the underground aquifers are alarming and could completely ruin the way of life for many Nevadans that live in or depend on this area. This really has irresponsible written all over it. The potential hazards far outweigh the potential benefits. Please don't do this.

Our focus for tomorrow's energy needs really should be on renewable, environmentally harmless sources. We, as a people, are above ruining pristine land like this for the profit of a few oil companies, aren't we? PLEASE RECONSIDER AND DENY THIS PROJECT.

Thank you,
Jeff Brooke
