Comments: Our Wild Buffalo Must Roam Free!!

As a warrior for our wildlife and our Earth, I am urging you to STOP harassing our wild buffalo and let them roam free as they have been doing for the past million years!

Redneck cattle ranchers don't care about the sanctity of life of Nature's majestic wonders, nor the survival of this planet! All they care about is money and profit along with maintaining the status quo of their so-called "traditions" from the barbaric 19th Century! Livestock ranchers have no business taking over OUR public lands!! Our public lands belong to We, The People, not to a mere handful of corrupt government bureaucrats and drunken redneck cowboys!!

And therefore, We, The People, urge you to use the best available modern science, and NOT to be swayed by politics!!

---

- \* Use the best available science to ensure a place for migratory buffalo on America's National Forests.
- \* Adopt standards to manage habitat on America's National Forests to support viable populations and genetic diversity of migratory buffalo.
- \* Assess local, traditional, and scientific knowledge of how migratory buffalo use America's National Forests. Biologists view buffalo as a keystone grassland species whose presence on the land enhances animal and plant diversity. In Hebgen Basin, buffalo seek out fire burned lodgepole pine forest and help restore fire-dependent habitats. Buffalo don't linger near water sources, making a positive contribution to watershed recovery.
- \* Assess using migratory buffalo as an indicator species for grassland recovery, animal and plant diversity, and watershed restoration.
- \* Update your long-term habitat plan to include a keystone wildlife species that has made their presence known on America's National Forests: America's last wild buffalo.
- \* The National Forest Management Act requires the Custer-Gallatin National Forest to "provide for diversity of plant and animal communities based on the suitability and capability of the specific land area in order to meet overall multiple-use objectives." 16 U.S.C. 1604(g)(3)(B).
- \* As a driver of biological diversity, the health of grasslands and watersheds, the buffalo are well suited to indicate whether key conditions on the forest are declining or improving based on the natural distribution and migrations of this native keystone species.
- \* It's up to you to see that migratory buffalo have a place and a secure future on America's National Forests.

---

We have lost too many of these iconic wonders, based on politics along with lies and greed from the special interest minority.

Brucellosis does NOT come from buffalo.  
They come from elk and was brought on by MAN,  
and it is the livestock industry who is lying to the people of this country..  
(and more likely bribing officials to pass treasonous legislation and unlawful policies)

On a personal note:  
More people nowadays are shunning meat and dairy products in favor of vegetarian and vegan alternatives.  
I am also a vegetarian and I have a deep disdain towards the Department Of Livestock for their crimes against Nature and intolerance towards our buffalo, wolves, grizzly bears, and other majestic wonders our Creator made for us and future generations to take care of, nurture, and behold and revere as very sacred.

The Department Of Livestock is not a god and  
NO MORTAL MAN IS SUPERIOR TO THE GREAT SPIRIT..

Please be forewarned that if our wildlife becomes extinct, so will the entire human race, and the ultimate consequences will come from the mighty hand of the Creator when He renders His final Judgment.

The pain that the livestock industry has inflicted upon Nature's majestic wonders, is the pain they shall suffer...  
Two, To A Thousand-Fold.

Just remember that when man disrupts the balance of nature, Nature will fight back with a vengeance, with droughts, floods, severe weather, earthquakes, volcanic eruptions, along with incurable plagues and pestilences.

It is wise to save these majestic wonders that have been the true symbols and emblems of the American west, and sacred icons to the spiritual faith of our indigenous sisters and brothers, for several eons.

Thank you..(Unyah)  
Billy "The WiZaRd" Angus
