Comments: I'm writing in favor of reserving more space for NON-motorized use.

Recreation Activity Participation as Reported in the NVUM Report, Table 1 clearly shows that motorized use is a much smaller component of activity than non-motorized activities. These statistics are also shown in Tables 7 and 17 on pages 16 and 31, respectively, of the Draft Assessment. See Table 1, NVUM Report link below.

Since the majority of recreational users in the GMUG are non-motorized, the statement on p.3 in the Draft Assessment that "Additional motorized loops and trails are desired by the public" is erroneous and misleading. Additional quiet use trails would more likely reflect the desires of the majority of recreational users.
