Comments: Thank you for the opportunity to comment. I'm writing as a user of the trail system surrounding Crested Butte. As a hiker & biker I use the trails partially to enjoy a quiet environment away from the loud noise of towns. I read that the FS is interpreting data to assert that more motorcycle trails are needed. My understating that is a misrepresentation of the data and an erroneous conclusion and that most users do value the quiet. I support a quiet environment for backcountry recreation.
