Comments: It is critical that these lands stay open to ALL types of users, including OHV's. There is so much of this country that is only accessible by foot, it is imperative that these lands stay open to motorized user groups to enjoy. We are literally surrounded by wilderness designated lands that offer no multi use. Without a vibrant and far reaching motorized trail system, congestion will ruin everyone's user experience. That is what is happening with current policy. Motorized users represent a varied group of people who cannot just strap on a backpack and go hiking. The old, the young, the crippled, the pregnant, the fat...they all deserve to enjoy our beautiful public land.
