Comments: As a motorized user of public lands, I implore you to consider all forms of recreation equal. By and large, motorized users are more considerable to others as well as the public lands themselves. The majority of us(motorized users) don't want anyone kicked off of trails. We want everyone to be able to enjoy our public lands. A large portion of trails are maintained by motorized user VOLUNTEERS. I ask you, how many single track trails are cleared in the spring of deadfall by dirtbikers? How many of these trails would become simply unusable without these volunteers?
