Title:

Comments: I often use the Grand Mesa, Gunnison and Uncompahgre National forests for hiking, four wheeling, mountain biking, dirt biking and camping. I believe any future management decisions should focus on increasing recreational opportunities for all user groups. This means maintaining equity between all forest users and not giving certain users and management plans a monopoly, which will force others out who have an equal right to their public lands.

I would like to see additional single track motorcycle trails and primitive camping opportunities in these areas.

Thanks

Ben
