Title:

Comments: I have been an avid mountain biker for about 20 years. I have ridden all over the world on trails that were non motorized and open to dirt bikes and atvs. I have also been riding atvs for over 25 years. Mountain bikes and their trails can be more destructive than their motorized counterparts. I do not support any of the proposed changes that allow mountain bikes but do not allow atvs and dirt bikes. These types of recreation tend to self segregate and there is certainly not enough usage in the uncomphagre valley to justify this infringement upon the rights of the citizens.
