Comments: Continuo use of public lands is vital to not only the people using it for recreation but greatly effects the local economies in that region. The economies continually are challenged by tourist dollars and closing the use of public lands is not a solution. Continued cooperation between the groups that use and support the public lands by keeping it multi use areas is of the most importance. Not only to individuals, but organizations and businesses. Public lands were set aside for all to use and I implore you to continue having it open for all users.
