Comments: Our beautiful public land is shrinking. We- you- need to protect what is left. As the sign says, land of many uses. Can we please designate non-motorized use areas? To be able to cross-country ski, bike, and hike with out loud, smelly, motors disturbing the wildlife and experience of being out side would be great. I believe this was the original purpose. I realize that there are many ways to enjoy the mountains where I live, but if there were places where I could go and know I would not have all my senses assaulted I would certainly seek those areas. Thank you for considering.
