Comments: In fairness to all users of public lands, keep trails open to motorized users. As someone with physical limitations (as well as being a more senior citizen), using my side-by-side is the ONLY way I can enjoy the trails and mountains. I can't hike or bike like younger people, but I can get to the places I love via a motorized vehicle. I shouldn't be deprived of the experience of enjoying our Western Colorado scenery, trails, wildlife, etc. when there's a viable way to get there that just happens to involve a motor to do so!!

Let's stop closing trails or limiting usage on OUR public lands when a particular user group's preferences don't coincide with those of a group that fits the ideology of the plan writer, developer or other parties interests!
