Title:

Comments: Seems that the non motorized group is constantly wanting to eliminate all trails for the motorized groups. Non-motorized users currently have two to three times the amount of trails compared to motorized trails yet it is never enough for them. It is time to tell them NO!! Keep our trails open to OHVs. After all, it is the money generated by OHV users that generates millions of dollars for our state/ trails yet the non motorized contribute little to no money. Please keep our trails open to OHV riders.
