Comments: Multi use trails and forests are being lost slowly as I have experienced over my 68 years. I have been active in trail construction and maintenance over the years and fought to preserve the rights of all users including motorized users. Unfortunately I have found that the animosity of younger non-motorized users of the forest always wins out. They are more vocal, organized, angry and bitter towards motorized riders...many want no users to use our forests and trails unless you are a hiker. I know I'm wasting my time writing this appeal to maintain the access that motorized users presently have... but hey...it can't hurt to try.

Too many people are trying to use our forest systems and too few Rangers and funds available to service those systems. Glad I'm old cause I don't like the changes I see coming.
