Comments: I am a life long resident of the Georgia mountains. I make my living here and have hiked and camped for decades in this area. I strongly oppose the scope of logging in this plan. Clean water and outdoor recreation are far more important to this area than timber fees. Sound management must include feedback from outside experts. The existing proposal does not allow for review of the areas to be harvested. Lacking this I do not see how the forest service can truthfully say they have the public's input.
