Title:

Comments: I have been hiking around the Foothill project area since 1975. I belong to 3 hiking groups. I am 77 now so don't hike as much but have wonderful memories. Public involvement should be guaranteed by NEPA. Limit logging to 63%. Invasive plants are taking over everywhere. More plans need to be made to control invasives. Don't make final decisions on the Foothills Landscape project proposal until a site level analysis on site is performed. Thanks for giving us input!
