Title:
Comments: The few comments I would like to share are below.

1. I don't see the specifics on where project activities will occur on the ground. I would like to see the site-specific treatment locations to see how this might affect how I interact with the Chattahoochee National Forest.
2. I would like to see the Hemlock Conservation areas expanded even further.
3. I strongly oppose any commercial logging.
4. I fully support designating as many acres as possible for "old-growth"

Thanks,

Jeff Huberty
