Comments: I would like to see specific sites assessed during the NEPA process. There is too much variation in the landscape to account for everything, and the toolbox approach gives interested parties no recourse when the actual decisions are made years down the road.

I'd also like to see commercial logging removed from the plan altogether. I believe commercial interests have no place on our public lands.

Other than those two issues, I think the project looks great, and I commend the team for their work!
