I love our national forests. I value protection of biodiversity and watersheds above all else. Recreation opportunities are second. Resource extraction is at the bottom of what is important to me. The economic engine of outdoor recreation brings so much value to local economies. I am deeply concerned about more logging, especially in sensitive areas. PLEASE have strong environmental planning for all watershed corridors, wildlife corridors, and ALL old growth forests. PLEASE develop a strong environmental plan that will include future habitat connectivity needs resulting in climate change.

really out of time. Take care of our forests. happy holidays.
