Comments: In the years that I worked for the Gallatin as reforestation forester, I recall only one time when there was a settlement of an access issue which was up the boulder river on cherry creek. I am concerned about other continuing/historical access issues on the CGNF. There was an unfortunate situation with the Big Timber District Ranger. I want the applicable employees of the Forest to work toward resolving the remaining situations. For example, there are questions about access in the Bridgers north of Flathead Pass. I'm sure there are many others of which trail crew supervisors are aware. If it requires legal attention from the Regional Office or higher, that or they should be brought to bear. The national political environment being what it is makes the issue just that much more important. Please do not let that or reduced funding and personnel move this off your plate. Thank you for protecting our heritage! SDC
