Comments: PLEASE manage habitat for wild buffalo under this revision! Under the outdated plan, the Gallatin National Forest permitted the Montana Department of Livestock to set up traps on the forest to capture hundreds of buffalo that were shipped to slaughter. It's time for decision makers to serve the needs of this iconic native species that has naturally returned to lands that are their birthright.

PLEASE do not allow fracking or drilling on this land!

PLEASE manage the waters for NO particulates!

PLEASE manage the air for NO particulates!
