Subject: Greenwater Access and Travel Management Project #47991

Hi Karen,

I have sent you email in the fall, the first time I became aware of the potential closures for public roads. I see the projects was modified with different alternatives.

While I still don't see my favorite (proposed solution), which is to leave roads as they are, without maintenance but not closing them so overtime they can become 4x4 or trails or be completely overgrown I can see that there are some other options. Based on the opinions of others I discussed the plans with and my understanding that Alternative #1 is not likely, I would like to voice my support for Alternative #3 and let you know that I speak on behalf of about 20 people who use the area often - from my immediate family to friends that join us and neighbors.

Please, try to be "innovative" and stop closing roads when they become "public safety issue", just post a sign "not maintained, travel on your own risk and but keep the roads open. In the light of such plan not existing today please approve Alternative #3.

Thank you

Tomas Vetrovsky
