Hello i would like to comment on the greenwater project and leave my feedback regarding the roads and the future of some said roads. See, ive been camping up in greenwater my entire life and i have always, always turned down road 70 and went up past the gravel shooting pit. even before the gravel pit was closed off and turned into a shooting area. that particular road is so well known to me and my family that we go up that way nearly every summer. I even make day trips out there on the off season just to spend a day out there and relax. i believe road 70 should still be a priority on the maintenance list. i have lots and lots of friends and family members who also frequently travel and camp out on that road.

i suppose what i really wanna say is that it road 70 should be kept open to the public like it is now and continued to be properly maintained.

Thank you for leaving a window for the public to comment on this matter and have a wonderful day.

Trevor
