Dear Forest Service Staff,

We know the forest service has to make some hard choices coming up. I would like to ask you to think about the Motorcycle, ATV, UTV, 4x4 community that uses these great roads and trails in the green water area. There are so many trails up there that give the community lots of riding options. I listed just some of the roads and trails I would like you consider keeping access to so we can still ride this area. I know if you put together a project list and the cost of the up keep and maintenance that is needed for each road and trail. This way as a community we can volunteer time to help do the work. We can as a community work on rising the money to the forest service pay for cost of up keep. All we need is the info of what you need and we can reach out to Dealers, parts house, Clubs, and riders to raise the money.

Roads and Trails to keep access open:
Trail numbers:
1175
941
1172
1171

Roads numbers:
70
7030
7032

Please remember "It not the destination, it is the journey along the way." Just because road just goes to a landing at the top of the hill. It is the journey along the way is what people remember the most when out enjoying the national forest service.

Sincerely,
Brad E Moore
