Comments: Comments on Custer Gallatin Forest Plan Revision #50185

I am not in favor of this plan. Simply said it goes against equal and balanced use of our public and forest lands. People from ALL areas including motorists and snowmobiles should be able to access this land. Tired of these groups that don't support motorized vehicles wanting special rights. We can all SHARE the land. If this the case then let's start blocking off equal size segments just for motorized vehicle users and no hikers, bikers, cross country skiers allowed. I'm sure that wouldn't work. We can all share and if someone is found abusing the land or rights then fine them. Tired of special rights groups trying to block off land for their special interests. I don't support this plan.
