Title:

Comments: comment Wild & Scenic designation (+)

Please include the Taylor

Fork River area within the Wild & Scenic Rivers designation in South Dakota!

Also I am writing as many government agencies I can about using WOOD CHIPPER technology to reduce forest fires, including the Department of Interior which can provide my letter by request. Forest thinning is too destructive to ecology as decades have shown, instead more research as WOOD CHIPPER technology is needed. Benefits of WOOD CHIPPER technology include moist forest floors, branch & down branch removal clears room for Wildlife, the mulch helps wildflowers & forage, helping wild Bees.

Respectfully,

MR. SHINEYWATER
