Comments: Wilderness Recommendations

Please reevaluate opportunities for more Wilderness areas in the Custer Gallatin National Forest. Having lived in the area for many years and having seen the impacts of encroachment of civilization on the Colorado Wilderness Areas, it is critical that this very important area in the lower 48 be protected. I believe the entire Gallatin Range roadless area as advocated by the Montanans for a Gallatin Wilderness, as well as recommend wilderness in the Crazy Mountains, and Bridger Range should be included.

Thank you for your consideration
