Title:

Comments: USFS airstrips are an important recreational and operational part of the USFS infrastructure. Please change all instances in the Proposed Action where "trails and roads" appear, to read: "trails, roads, and airstrips".

Please restate aviation as a legitimate access method to National forest lands.

Please revise the Proposed Action to include guidance on the importance of coordinating with volunteer groups.

Please place greater emphasis on airstrip infrastructure through direct inclusion of airstrip guidance and instructions in the Proposed Action document.

Please include sources of information on airstrips in the Proposed Action document.

Within the next 10 years, the bulk of baby boomers will retire, increasing use of recreational airstrips. Please include recreational aviation and airstrips in order to encompass potential future demand on airstrips.

Thank you.
