Comments: Custer Gallatin Plan Revision

Hello Forest Service,

Thank you for your service to the Custer Gallatin. I am writing to ask that you please list Bison as a species of conservation concern.

Yellowstone Park might have plenty of bison, but they are in fact an endangered species when you consider their historical range and numbers. I'd like to see the federal and local agencies doing more to protect Bison. They are essential to the overall health of the ecosystem and our National Mammal.

Sincerely,

Katherine Taylor
