Title:

Comments: economic sustainability by providing people and communities with a range of economic benefits for present and future generations. These benefits include timber production, grazing, recreation, and additional multiple uses. The Economic Benefits does not need bad science of Climate change to be part of any forest plan, .The Species acts must be updated to provide for Humans first consideration. Environmental activist must allow the Forest Service to fight fire before they start by cutting old growth trees and under bushes Identify and evaluate lands that may be suitable for timber sales, mining, oil and gas, all natural resources. Identify eligible rivers for new dams to support, fishing, farming, boating, energy, recreation. remove all past environmental activist from agency.
