Comments: To the US Forest Service, Minturn, CO

I have read about the Berlaimont Estates Road that needs Forest Service approval. I am very opposed to this road going into an area that is elk winter range. The wildlife in our area is threatened as it is, and this road is only going to further encroach upon their habitat. Please consider what is in the best interest of all of the Eagle Valley residents, not just a select few who want to build in Berlaimont. The presence of wildlife is one important reason why we live here. We need to protect them.

Thank you.
