Comments: Public Comment - Camp May Water Pipeline Project

Lynn:

I strongly support the building of the proposed pipeline to Pajarito Mountain Ski area. This is long overdue. The environmental impact will be minimal, and in fact may be positive in the long term due to bringing additional water to the mountain during dry winter years. The economic impact to Los Alamos and Northern New Mexico will certainly be positive and the overall quality of life for residents in the area will be vastly improved, especially for skiers. I hope this moves forward as quickly as possible.

Thanks,

Doug Hemphill
