First name: Eric

Last name: Leonard

Organization: Los Alamos Ski Board

Title:

Comments: This pipeline has been needed for many years. Not just to aid the ski hill (without the pipeline, I think the ski hill will not last long) but for fire protection and for the county so that they may improve other recreation facilities in the Camp May area.

Pajarito Ski area does not have a water source for snow making that is common to many other ski areas in the southwest. If there was a creek or stream from which to pump water from the ski hill would not be in the current situation. With the changing climate and unpredictable weather patterns we have been experiencing, a more reliable water source is necessary.

Please help keep this valuable resource alive and well here in Northern New Mexico.

Thank you....
