Last name: Agzarian

Organization:

Title:

Comments: Please do not ignore the environment and open up further pristine lands to business development. This is not responsible behavior. It is extremely reckless and taking away from future generations and wildlife. These lands have been protected and should not be removed from that status. I cannot understand why business interests are all of a sudden more important than taking care of our planet. We have damaged our world beyond belief in the 200 years of industrial development and it is time to reckon with the consequences.
