First name: Timothy

Last name: Devine

Organization:

Title:

Comments: These lands are special and should be protected and NOT opened up for mineral/gas extraction. The infrastructure of these types of projects is polluting in and of themselves, not to mention the possibility of an accident and/or a catastrophic failure of any pipelines, vehicles, etc ... We should work to save these kinds of places, not tear them up for the Polluting Extraction Industries ... the EPA should NOT suck up to the PEI!
