Title:

Comments: Please do not allow leasing to oil and gas of NF lands in the Ruby Mtns area. This area is a rare gem in Nevada. It is in close proximity to major roads so it can be easily accessed by our nature-loving public. That makes it very special and very irreplaceable. This is a gorgeous area for fishing, camping, and hiking. My grandsons love this area because it is not so remote. That means they can hike with us in on their own and experience the joys of nature.

Please do not allow leasing here for oil and gas. There are plenty of more distant locations for oil and gas that would not create user conflicts. Please save the Ruby Mtns.
